Active Ingredients	14.00%
Citric Acid.....	10.00%
Sodium Lauryl Sulfate	4.00%

Other Ingredients.....86.00%

Sodium Benzoate, Polyglyceryl Oleate, Guar Gum & Water	
Total.....	100.00%

How It Works:

SNS Weed Rot™ is a Systemic Post Emergence Non-Selective Weed Killer. It works by removing the waxy layer and penetrates deep into the roots to stop the plant from taking in amino acids and nutrients.

Directions For Mix:

Shake concentrate before mixing. Start with 24 fluid ounces of concentrate and add 104 fluid ounces of water to make 1 gallon of Ready To Use. More or less of the concentrate can be mixed based on weed size, weed type and water quality. Mix final solution before use.

Directions for Use:

WeedRot™ works best on weeds less than 6 inches in height and smaller. Weeds larger than 6 inches may require additional applications or higher concentrated mixes. Spraying may be done 8 hours prior to rain or irrigation. You will notice weeds browning in 1 to 2 days of application and complete kill in 5 to 10 days depending on temperature. WeedRot™ should not harm higher order plants like trees, shrubs and vines when slight over spray contacts them, however some discoloration maybe noticed.

Attention: WeedRot™ may stain surfaces, including Asphalt and other materials that absorb oil. Please test spray in a small area before applying WeedRot™.

Safe Around Home And
Garden When Used As
Directed. Safe for
Everyday Use.

WEEDROT™

Sierra Natural Science Weed Killer

- Systemic
- Non - Selective
- Post Emergent
