Active Ingredients	3.50%
Citric Acid	2.50%
Sodium Lauryl Sulfate	1.00%
Other Ingredients	96.50%
Sodium Benzoate, Polyglyceryl Oleate, Gaur Gum & Water	
Total	100.00%

How It Works:
SNS Weed Rot™ is a Natural Systemic Post Emergence Non-Selective Weed Killer. It works by removing the waxy layer and penetrates deep into the roots to stop the plant from taking in amino acids and nutrients.

Directions for Use:
Shake Well Before Using. Spray directly on leaves and stems, saturating the entire plant. Weed-Rot™ works best on weeds less than 6 inches in height and smaller, weeds larger than 6 inches may require additional applications. Spraying may be done 8 hours prior to rain or irrigation. You will notice weeds browning in 1 to 2 days of application and complete kill in 5 to 10 days depending on temperature. Weed-Rot™ should not harm higher order plants like trees, shrubs and vines when slight over spray contacts them, however some discoloration may be noticed.

Caution: Weed Rot™ may stain surfaces, including Asphalt and other materials that absorb oil. Please test spray in a small area before applying Weed Rot™.

WEEDROT™

Sierra Natural Science Weed Killer

- Systemic
- Non - Selective
- Post Emergent
- EPA Exempt
- Safe Around Home & Garden When Used as Directed

Controls Star Thistle, Clover, Spurge, Dandelions

READY TO USE
