FIFRA 25(b)

**CAN BE USED IN ORGANIC PRODUCTION** 

**Mixing Compatibility**  
  + **Can be mixed Call for Information**

## WHERE TO USE

## APPLICATION

### Greenhouse/Drip Irrigation

Add 1 oz. per 50 feet of drip or sprinkler irrigation line. May be added through fertilizer port or reservoir.

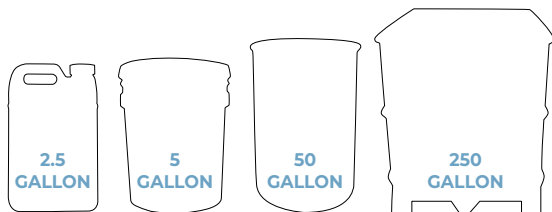

### Crop Watering-Tanks/Reservoirs

Add 1 oz. per gallon of water. Allow to mix well prior to irrigating. Repeat application every 7-10 days.

### Crop Watering-Sprinklers

Add 2-6 quarts per acre of irrigation system. Add product at the end of the irrigation cycle. Repeat application every 7-10 days or until irrigation system performance is at peak.
